

STANDARD LIFE / BRAINWASHER
Limited 7" release out MAY 1st.

Rice Is Nice are excited to bring you the first vinyl release from Sydney's Traps.

After a successful single release in 2008, leading to an onslaught of live performances including playing with These New Puritans (UK), Children Collide, Pivot and festivals Playground Weekender and My Filthy Riot, Traps are now on to their second release which is the smashingly limited 7" Standard Life.

In support of this release, Traps will be launching the record on a mutha lickin boat!

This will be the first of many live shows in 2009, possible by sea but definitely on land, where you will have a chance to see Traps performing their brilliant rousing bass led, dark, jangly guitar led numbers.

Traps are Kieran Day on vocals, guitar and keys; Ben Hassell on lead guitar, vocals and keys; Matt Edge on bass and Mal Page on drums.

Combining quick paced guitar stabs, a driving beat and nonchalant vocals, this is the finest slice of indie I've heard come out of this city in a while...

- *3D World*

It's impossible to ignore the fact that Traps are a talented band

- *Polaroids Of Androids*

There is something about the bands sound that is so fantastically abrasive.
